

## Allegheny Pellet Acquisition

New England Wood Pellet, LLC, a Rentech Company, has acquired the assets of Allegheny Pellet Corporation, a producer of wood pellets for the domestic heating market. The acquisition expands New England Wood Pellet's market position as the largest wood pellet manufacturer for the U.S. heating market with facilities in Jaffrey, NH, Schuylers, NY and Deposit, NY.

Allegheny's wood pellet plant in Youngsville, Pennsylvania has been operating since 1993. The company plans to add staff to increase the Allegheny plant's production to approximately 50,000 tons over the next year to meet demand for pellets in Allegheny's target market of Pennsylvania and New York.

Rentech and New England Wood Pellet share Allegheny Pellet's belief that pellet fuels made from sustainably produced biomass can play a major role in reducing demand for fossil heating fuels.
